

ST. DUNSTAN'S

Year 5 Rationale

Summer 1st Half Term

Conservation

Our responsibility to improve our future

Our focus will continue to be on exploring the wonders of geography, delving deeper into understanding our planet and its remarkable diversity. We are committed to fostering a sense of wonder and appreciation for the natural world, inspired by the beauty of God's creation.

In geography, we will be turning our attention to India, a land rich in biodiversity. Through our exploration, we aim to shed light on the vital efforts being made to preserve one of nature's most magnificent creatures: the tiger. Your children will learn about the conservation initiatives in India and the significance of protecting these majestic animals for future generations. Moreover, we will be incorporating art into our curriculum by exploring the theme of tiger portraits. Through creative expression, our students will have the opportunity to showcase their understanding of these magnificent creatures, capturing their essence and beauty on paper.

Continuing our exploration of explorers, we will delve into the captivating story of Ernest Shackleton with 'Shackleton's journey' by William Grill. Through this historical expedition, we aim to instil in our students the values of perseverance, courage, and teamwork, as we embark on our own journey of discovery.
