

ST. DUNSTAN'S

Year 5 Rationale
Spring 1st Half Term
Positive Choices

In Year 5, our overarching theme focuses on resourcefulness and making positive learning choices. This term, in our English lessons, we will be focusing on developing the children's understanding of persuasive language to support their public speaking. We will guide Year 5 to write balanced arguments, to build up to a persuasive report that demonstrates their learning about Henry VIII.

In RE, we are exploring the journey from Galilee to Jerusalem, delving into the significance of the Beatitudes. Through this, Year 5 will uncover the timeless importance of these teachings, reflecting on how they inspire us to embody virtues such as hope, compassion, and justice in our lives today.

In Science, we will be working scientifically, as the children investigate mixtures and solutions, examining reversible and irreversible changes. Through hands-on experiments and scientific inquiry, Year 5 will deepen their understanding of how science impacts the world around them, fostering curiosity and critical thinking.

This term, we are excited to celebrate Creative Arts Week, where our focus will be on our community and the beauty of our differences, exploring how we are all unique yet come together to support and love one another.
