

ST. DUNSTAN'S

Year 5 Rationale

Summer 2nd Half Term

Why Are India's Tigers Under Threat?

In the forthcoming half-term, we continue with our commitment to instilling environmental consciousness in our pupils through our learning on the conservation of tigers in India. Pupils will not only deepen their geographical understanding but also cultivate empathy and a sense of responsibility towards the natural world. Building on their knowledge of conservation, the children will be writing a letter to persuade people to explain why it is important to save the tigers. This will be strengthened by our learning on life cycles in science.

Furthermore, our eagerly anticipated Science Expo serves as a culmination of our students' scientific learning. This event not only shows the importance of their knowledge and skills, but also encourages critical thinking, creativity, and collaboration. It is a testament to our dedication to nurturing curiosity and fostering a love for science.
